The Neito Kaikki Reflector 3.2.1 for Mac is a wireless mirror and streaming receiver that works great with Google Cast™, AirPlay™ and AirParrot 2®. Mirror content on a large screen without wires or complex installations. Play games, watch movies, demo apps or present with the palm of your hand. Even send screens directly to YouTube for others to watch live. Everything you do on your device can be sent wirelessly to Reflector! STREAM MOVIES, TV SHOWS AND MORE Stream your favorite shows and movies in the app from your phone, tablet or computer. The app can be installed on the most popular entertainment devices such as Amazon Fire TV™ and Fire TV Stick™. It's easy to share videos from your phone or tablet with others, or pair the tool with AirParrot 2 in your home theater to stream content to the big screen. AN ALL-IN-ONE RECEIVER WITH AIRPLAY AND GOOGLE CAST BUILT IN Reflector for macOS takes wireless mirror image and streaming from different devices. Because Google Cast and AirPlay Mirroring are built into the most popular devices, there's nothing to install on your phone or tablet. Easy mirror or stream with iPad™, iPhone™ or Android™ device wireless. Once installed, just plug the device into the app and start mirroring! NO EXTRAS REQUIRED Program works great with devices that you already have. Install the app on your Mac™ or Windows™ to get mirror or streaming, or install the app on your Android home entertainment device. The app is wireless and does not require any adapters, cables or complex installations. Just start the tool and connect! STEP AWAY AND STAY IN CONTROL App Director iOS is designed to allow speakers to move away from their Mac or PC and continue to interact with the audience. Use the app director on your iPad or iPhone to highlight certain screens, or use it to select which screens are shown. The director of the app allows the mirror image to become part of the environment, keeping the focus on the content that matters most. REFLECTOR STUDENT FOR IOS Reflector Student was designed and created specifically for use in classrooms and schools. This helps students connect to the app through limited networks. In addition, students can now get a lively look at other peer devices without leaving their own desks and mobile devices. Related post published on 20.10.2018 Published on 26.08.2018. Published on 14.10.2020 Published 17.06.2018 .06.2020 Published on Published on July 28, 2020 Published on 14.06.2020 Download now (100% Working Link) Reflector 2020 Mac is a wireless mirror and streaming receiver that works well with Google Cast, AirPlay and AirParrot 2. Mirror content on a large screen without wires or complex installations. Play Play Watch movies, demo apps or present with palm. The reflector for Mac crack send screens directly to YouTube for others to watch live. Everything you do on your device can be sent wirelessly to Reflector. The reflector is a wireless mirror image and streaming receiver that allows you to connect almost any combination of devices to your computer at the same time. Most Android devices support Google Cast in their native language, but those that still can't mirror. Send mirror screens directly to YouTube at the touch of a button and invite everyone to watch in real time. Mac Reflector Features: The last receiver you'll ever need now is the mirror with iOS 9. The reflector introduces and organizes several devices of any type with ease. Android screen mirror reflection here. The reflector can also act as a wireless audio receiver. The reflector can act as an audio receiver. This app allows the Android screen to mirror on most phones and tablets. The reflector control center makes it easy to control connected devices. The reflector automatically selects a layout that makes sense. This is to choose the frame of the device to make your mirror screen look like. It's easy to hide the device without turning it off. Wireless mirror of the screen of a mobile device on the computer. The reflector easily gets an Android screen mirrored and streaming. The reflector can get mirror connections to iPad, iPhone and iPod. Record any connected device. Turn the sound from the microphone into the recording. Screens streaming the device directly on YouTube in real time. Include the device's frames in the recording for a polished look. Add webcam video to record for personal contact and feel. Record multiple devices at the same time, and include. The reflector can also receive streaming connections. It's easy to send your computer screens to a reflector with fast-connected codes. On the screen, the codes record the device to be connected to see the screen. Save your preferences for later, or be asked every time. Requirements: Mac OS X Kodiak, 10.0 (Cheetah), 10.1 (Puma), 10.2 (Jaguar), 10.3 (Panther), 10.4 (Tiger), 10.5 (Leopard), 10.6 (Snow Leopard), 10.7 (Lion) OS X 10.58 (Mountain Lion), 10.9 (Mavericks), 10.10 (Yosemite), 10.11 (El Capitan) and macOS 10.12 (Sierra), 10.13 (High Sierra), 10.14 (Mojave), 10.15 (Catalina) and later version. Supported hardware: Intel or PowerPC Mac. Reflector 3.2.1 Crack FREE Download Title: Reflector Version: 3.0.2 Developer: Proteins Ltd Mac Platform: Intel OS Version: OS X 10.7 or Later CPU Type (s) th Speed: 64-bit Processor Includes: Pre-K'ed (TNT) Website: Overview Simple, Simple, Simple to Use and Practical Receiver Wirelessly displaying your iOS screen on Mac Reflector, it's a user-focused and smooth macOS app specifically designed to help you reflect your iPhone, iPad, or iPod Touch screen on your desktop. Helps quickly and easily reflect and record your iOS device on your Mac In other words, Reflector is An AirPlay receiver that makes it easier to demonstrate mobile apps on big screens without wires or complex moods. So you can play games, watch movies, demonstrate iOS apps directly on your Mac. The best thing about Reflector is that it uses airPlay mirror function that is built into the device, and as a result, you are not required to install any additional apps on your mobile device. The reflector is similar to the Apple TV, a fact that translates as a no-problem experience. Display multiple devices at the same time While most iOS devices support mirror image and work flawlessly with Reflector, you can find a list with all compatible iOS devices on the Reflector compatibility webpage. To start using Reflector, you must connect your Mac and iOS device to one wireless network, launch a desktop app, and enable the display mirror function to directly form the device. The streaming process starts immediately, and Reflector lets you record your iPhone, iPad, or iPod Touch display with frames and audio. On top of this, Reflector is able to reflect multiple devices on one computer to compare apps, multiple presentations, screen monitoring, competitions, and more. Enjoy the distraction of the free iOS recording environment provided in full-screen Mode You have the ability to run the reflector on the full screen in order to prevent any distractions, keep its main window always on top of all other apps, change the color of the device frame to match your iPhone, iPad or iPod Touch, and mirror only audio without video stream. The reflector also allows you to restrict access to AirPlay broadcasts using a user-defined password and keep unwanted speakers away from your Mac display. What's new in Reflector 3.0.2 has allowed a glitch when running experienced multiple users.
